EDUCATION

Western University

Bachelor of Arts in Computer Science

London, ON

Expected August 2029

- Western Scholarship of Distinction (\$3,500), Lillian H. Parsons Bursary (\$1,000), EY x Accenture Case Competition Finalist
- **Coursework:** Computer Science Fundamentals I, Computer Science Fundamentals II, Foundations of Computer Science
- **GPA:** 3.95/4.0 **SAT:** 1540

TECHNICAL SKILLS

Languages and Frameworks: Java (Spring Boot), Python (FastAPI), JavaScript (React, Node.js), SQL.

Developer Tools: Git, Visual Studio, PyCharm, GitHub, Pandas, Spacy, Google AI Studio, Jira, Railway, Vercel, AWS.

APIs & Integration: RESTful APIs, WebSockets, OAuth, Redis, Postgres, Docker.

EXPERIENCE

Dice AI

May 2025 – Present

Start-up Cofounder

Oakville, ON

- Co-founded Dice AI, an AI-powered financial platform for digital creators — architected full-stack SaaS using Next.js, React, PostgreSQL, Redis, and BullMQ, deployed on Railway + Vercel with CI/CD via GitHub.
- Built a double-entry bookkeeping ledger with 10+ OAuth integrations (YouTube, Instagram, Stripe, etc.), encrypted token storage via AWS Secrets Manager, and automated ingestion pipelines with idempotency and rate-limit handling.
- Engineered an AI contract review feature using Anthropic Claude with a PII sanitization pipeline (OCR → Named Entity Recognition → format-preserving tokenization) ensuring zero raw user data reaches external LLMs.

Autumn

March 2026 - Present

Software-Engineer Intern — Remote

London, ON

- Engineered a provider onboarding flow (27 screens, 7 steps) in Next.js with Zustand, Prisma/PostgreSQL, and a weighted real-time completion scoring engine for grief counselors to publish SEO-structured profiles on autumn.co.
- Built a LinkedIn and website scrape-to-prefill system using Puppeteer with silent failure handling, JWT magic-link resume, and Inngest-scheduled abandonment email sequences to minimize drop-off across a 15–20 minute onboarding flow.

AtlasHaus Design

November 2025 – May 2026

Software-Engineer Intern — Remote

Ottawa, ON

- Engineered custom Shopify product pages using Liquid templates and JavaScript, implementing dynamic FAQ accordions, enhanced product descriptions with rich media support, and SEO-optimized structured data markup.
- Enhanced e-commerce conversion funnel by analyzing user behavior through Google Analytics and heat mapping, refactoring product layout with custom JavaScript modules to optimize content hierarchy, visual consistency, and checkout flow.

Team Canada | Badminton

September 2020 – Present

Junior National Team

Oakville, ON

- **Ranked #2** Under 17 in Canada; Represented Canada at the 2023 XXVI Yonex PanAm Individual Championship.
- Served as a **YONEX Sponsorship Representative**, selected as one of more than **10,000** nationwide athletes; distributed over **\$7,000** in equipment, driving a 15% increase in athlete engagement and promotional reach across local tournaments

PROJECTS

Western Founders Network Projects Website 🌐 | *JavaScript, HTML, CSS*

- Developed a React website for the WFN club featuring dynamic team and member profile pages, creating a centralized platform where **700+** users can explore the club's organizational structure, and discover executive responsibilities.
- Implemented reusable React components and structured routing with Vite and React Router, coordinating development on GitHub through organized branches, collaborative pull requests, and iterative version-controlled updates.

Interview Royale 🌐 | *TypeScript, Python*

- Developed RESTful API endpoints and WebSocket handlers using FastAPI and Python to manage game state, player interactions, and real-time position updates with sub-100ms latency across distributed client connections.
- Built a real-time multiplayer interview practice platform supporting 10+ concurrent users with WebSocket-based communication, live video/audio streaming at 15 FPS, and OpenAI powered answer evaluation using STAR method criteria.
- Designed real-time features including proximity-based spatial audio with distance-based volume attenuation, live video broadcasting with JPEG compression, and synchronized game state management with updates across distributed clients.

Refresh 🌐 | *JavaScript, HTML, CSS*

- Designed and built a full-featured Chrome extension to improve productivity, implementing **website white/blacklisting**, focus timers, inactivity dimming, and lock-in modes to reduce distractions by an estimated **40–60%** for users.
- Engineered a **usage analytics system** tracking daily, weekly, and monthly browsing behavior, enabling data-driven habit insights and streak-based motivation features; **custom reminder system** for posture and eye-strain checks.

INTERESTS

Interests: Penny Stocks, Basketball, Swimming (regional), Chess (Elo:**1936**), Cultural Foods, Venture Capital, Tech-Startups.

Clubs: Western Founders Network - Software Engineer, Western Science Student Council - Finance Director, Varsity Badminton.
